

Explore the Parks

Objective - Provide a website that allows users to maintain a record of the activities they have participated in at each National Park

Profile - Prospective users of the website would be visitors and advocates of the National Parks

DB Model

Users	Activities	Parks	experiences	activities_parks
Id - pk Username Full Name Email Password	Id - pk Name logo_url	Id - pk Name Description image_url	Id - pk Users.id - fk Activities.id - fk Parks.id - fk Date	Id - pk Activities.id park.id

Description - Users will be able to set up an account, update their activity history. Users will be able to visit the website and add a record of park activities that they have participated in and view those records and explore other parks and activities to participate in.

Requirements

- Maintain an authenticated user's list of activities that they have participated in at each National Park
- Add activities and park tuples
- View Parks Visited
- View Activities Participated in
- Search new Parks and Activities

Stretch Goal

- Provide a feed of users activities and photos from those activities
